Main Target:

- Encourage Lifelong Learning by nurturing mutual exchanges, cooperation and mobility across various education and training systems in the European Union so that they will become a best practice model worldwide.

The implementation of both projects involved professional training and the development of professional skills and competencies at European standards for 40 students of the school, specializing as Generalist Nurse Practitioners (20 2nd year students 20 3rd year students) by undergoing four clinical stages in the internationally renowned clinic Royal Artemis Medical Center, Paphos, Cyprus.

"The right person at the right place"

Marinescu (Tudor) Victoria, 3rd year student specializing as Generalist Nurse and participant in the project Leonardo Da Vinci LLP-LdV/IVT/2013/RO/042, is the winner of the first prize offered by A.P.C.D.E.F.P for "The Best Mobility Story 2008-2014"

…"This project helps nurture team spirit, which is paramount in medicine, favors social, cultural and linguistic interactions, facilitates our entry on the European labor market and, last but not least, mediates the collaboration among institutions."

Conclusions:

Technical, linguistic and cultural benefits following the two mobility programs:

- Developing professional skills in a new social, professional and cultural setting
- Becoming competitive on the European labor market
- Developing professional communication skills in English
- Developing relational, cooperation and collaboration skills (actual work in a cross-disciplinary and multicultural nursing team)
- Self-confidence boost
- Developing as active and responsible citizens in relation to the challenges of contemporary European society
- Expanding cultural horizons
- Acknowledgement of professional skills in the Europass mobility certificate
- Erasmus+ means collaboration, cooperation, creative solutions, innovation and being connected to the labor market
